**Subject:** West Virginia Hot Topics - Natonal Governors Association Meeting

For the Administrator's meeting with West Virginia Governor Earl Ray Tomblin on Saturday, February 21, 2014, Region III is offering the following Hot Topics.

**\* Freedom Industries chemical spill (Jan 9) - -** The Region 3 Lab is providing analytical and technical support to remediation and eventual dismanteling of the Freedom Industries site. Responding to a public confidence crisis, the state is standing up its own residential testing program using independent contractors. NOTE: On February 5, I met with Governor Tomblin, his cabinet, staff and representatives of the CDC. We discussed the role of the federal government and the support we've provided the state in response to the chemical spill. We were later joined by members of the state legislature and local officials. Following the meeting I participated in a press conference that was covered by local and national press. The Governor and his cabinet were extremely appreciative of the federal support.

\* **Patriot Coal slurry spill (Feb 11)** - - West Virginia Department of Environmental Protection has indicated the spill was the result of a valve failure and they have the situation under control, clean up efforts began quickly, and the state does not require EPA assistance at this time.

- \* **Buffalo Mtn/King Coal Highway** - - Adverse Rating: In June 2012, Region 3 provided an adverse rating of the King Coal Highway/Buffalo Mountain Draft EIS. The Region is coordinating with FHWA and the CORPS and anticipates reviewing the final SEIS in early Spring 2014.
